SUMMARY

Fullstack Engineer specializing in scalable SaaS, fintech systems, and AI-driven applications Experienced in architecting multi-tenant platforms supporting 1,000+ users and 200+ organizations Built high-throughput systems handling sustained real-time workloads and financial transactions Strong focus on system design, performance optimization, and production-scale reliability

EXPERIENCE

Punch Group

Fullstack Engineer

Ikeja, Lagos, Nigeria

2025-09 - Present

- Architected multi-tenant SaaS platform supporting multiple organizations and managing 1,000+ talent profiles
- Designed and implemented RBAC, authentication, and session management across distributed systems
- Built modular GraphQL backend using Apollo, improving development velocity and maintainability
- Implemented Redis-based caching, rate limiting, and distributed locking, improving system performance under load
- Engineered high-throughput productivity and time-tracking system handling ~24 requests per user/hour across 40+ concurrent users over sustained 8-hour usage periods
- Developed real-time ticketing and workflow system with audit trails for operational transparency
- Built AI-powered recruitment assistant automating candidate screening and structured evaluations
- Developed cross-platform applications (Electron + React Native) with offline-first architecture and background synchronization

Techbox Labs

Fullstack Developer

Lagos, Nigeria

2025-01 - 2025-09

- Led development of StockPulse AI POS and inventory intelligence system for real-time stock and sales operations
- Implemented transactional consistency and real-time inventory tracking, reducing discrepancies across business workflows
- Designed AI-driven demand forecasting and profit optimization systems for data-informed decision-making
- Built fintech payment infrastructure with Paystack integration for secure and reliable transactions
- Implemented multi-party payment splitting (fees, VAT, payouts) for complex financial flows
- Developed real-time communication systems and cross-platform applications
- Improved user engagement by 35% through gamification and behavioral incentive mechanisms

Syllabux Learning Solutions

Fullstack Developer

Lagos, Nigeria

2024-06 - 2024-12

- Developed multi-tenant school management SaaS platform used by 200+ schools
- Built scalable academic, student, and staff management systems supporting large institutional datasets
- Designed GraphQL APIs using Apollo for efficient and structured data access
- Built offline-first mobile applications using SQLite with reliable synchronization
- Integrated AI-assisted academic analytics and reporting systems
- Automated report generation workflows, significantly reducing manual administrative effort

Freelance

Fullstack Developer

Lagos, Nigeria

2020-11 - 2024-06

- Delivered fullstack web and mobile solutions for multiple clients across industries
- Designed backend systems and integrated responsive frontend applications
- Improved performance, scalability, and reliability of deployed applications

PROJECTS

- Wigomarket** *eCommerce, Logistics, Payments, Real-time*
Built multi-vendor eCommerce and logistics platform with order splitting, dispatch tracking, escrow payments, and real-time notifications supporting marketplace-scale operations
- PopnChat** *Fintech, Chat, WebSockets, Payments* <https://popnchats.com>
Developed real-time messaging and fintech platform with wallet infrastructure and ledger system, processing over ₦600,000 in transactions within hours of launch
- Shard AI** *Productivity, Gamification*
Built AI-powered productivity system with automated task generation, gamification, and real-time collaboration features
- LifeAdmin** *Mobile, Offline-first*
Developed offline-first mobile productivity application with local-first architecture and resilient synchronization

SKILLS

Core Stack:	TypeScript, JavaScript, Node.js, React, Next.js, Golang, React Native
Databases:	PostgreSQL, MySQL, MongoDB, SQLite
Infrastructure & Tools:	Docker, AWS, CI/CD, Git, Apollo GraphQL, Redis, Electron, Expo
Systems & Architecture:	Multi-tenant SaaS, High-throughput Systems, System Architecture, Real-time Systems
Domain Expertise:	AI Integrations, Fintech Systems, ERP/POS Platforms, Offline-first Applications

EDUCATION

University of Benin	Nigeria
Bachelor of Engineering Mechanical Engineering <i>GPA: 4.02</i>	2018-01 - 2024-03
